SUMMARY

AI Engineer and Web Developer who ships production LLM systems people depend on — AI agents, RAG, fraud detection, fintech and edtech platforms, built end to end with evals, guardrails and CI/CD. Currently building the contributor platform at Levi AI and AI-powered products at Tinzwave. 1st place, Nomba × DevCareer Hackathon ($4,000); 2nd place, Wema Hackaholics 7.0; covered by Punch, BusinessDay, Naijapreneur and Nidacity.

EXPERIENCE

AI Engineer — Levi AI (leviai.app) 2026 – Present

- Helping build and scale the human-expertise platform behind production AI: 2k+ African contributors doing data labelling, text annotation and preference ranking (RLHF-style) for AI companies.
- Build the contributor platform and task marketplace — onboarding, role selection, skill-matched task feeds, pay-rate display and dashboards — and the infrastructure that keeps it reliable as the contributor base grows.

AI Engineer & Web Developer — Tinzwave Technologies 2024 – Present

- Build and ship AI-powered web products for client businesses, integrating LLM features and owning post-launch iteration.
- Delivered **KizFarm** (farm-to-home marketplace; Next.js/TypeScript/Express) and **NairaGame** (gaming community & marketplace PWA serving thousands; Node.js/MongoDB) end to end.

Freelance AI & Web Engineer — Independent 2023 – Present

- Designed, built and operate RelayFlow, TrustBridge AI, PayWise, Study Master and My School Manager end to end — AI agents, RAG, voice pipelines and full-stack platforms; onboarded 5+ schools and own hosting, payments, email and monitoring for every deployment.

SELECTED PROJECTS

RelayFlow — multi-channel AI agent for SMEs Live · Aug 2026

- One agent across WhatsApp, Telegram, Slack and Gmail: summarises each channel and drafts replies behind a mandatory **approve-before-send** guardrail; cron-scheduled tasks email their results.
- Eval harness: golden Q&A set scored by an LLM judge plus scope-drift and prompt-injection tests; findings drove new guardrails, re-verified to zero injection successes.

Fastify · TypeScript · React/Vite · OpenAI Responses API · MongoDB · Railway

TrustBridge AI — real-time bank fraud protection **2nd Place, Wema Hackaholics 7.0** · Aug 2026

- Behavioural risk engine scoring every login and transfer against the customer's own baseline, intervening mid-attack via a graduated ladder (allow → challenge → step-up → freeze & alert the fraud desk).
- Deepfake-resistant liveness: four randomised challenges per run with MediaPipe face/gesture models running entirely in-browser; presented live to Wema Bank judges.

Python · NiceGUI (FastAPI + WebSockets) · MediaPipe · Google Gemini · MongoDB Atlas

PayWise — AI bookkeeping on WhatsApp for market traders **1st Place, Nomba × DevCareer Hackathon** · Jun 2026

- Credit sales recorded as voice notes in Pidgin, Yoruba, Igbo or Hausa; an LLM pipeline extracts customer, items, amounts and due dates; the Nomba banking API issues a virtual account per debtor for repayment.

FastAPI · LangGraph · GPT · Twilio WhatsApp · Nomba API · MongoDB

Study Master — AI exam-prep for WAEC, NECO & JAMB **50+ active students** · studymaster.live

- RAG over the official syllabi — chunked with overlap, embedded with text-embedding-3, retrieved from MongoDB Atlas Vector Search so answers are grounded in the source; plus CBT mock exams, flashcards and study plans.

Next.js · React · FastAPI · OpenAI API · Atlas Vector Search · Vercel

My School Manager — school operations platform **Trusted by 5+ schools** · Live

- CBT portal with instant grading, AI exam-paper generator, smart notes, print-ready report cards and admin analytics — in daily use by teachers, students and administrators.

Node.js · Express · React · MongoDB · AWS

TECHNICAL SKILLS

LLM systems	OpenAI SDK / Responses API, Anthropic Claude SDK, Google Gemini, LangGraph, LangChain, agents & tool calling, prompt & context engineering, RAG (text-embedding-3, MongoDB Atlas Vector Search), structured outputs, LLM evals (golden sets, LLM-as-judge, guardrail & prompt-injection tests)
Languages	Python, TypeScript, JavaScript (ES6+), SQL
Backend & APIs	FastAPI, Node.js, Express, Fastify, REST & webhook APIs, OAuth 2.0, WebSockets / SSE, Twilio, Resend
Frontend	React, Next.js, Vite, Tailwind CSS, Radix UI, Progressive Web Apps
Data & DevOps	MongoDB / Atlas, PostgreSQL, Docker, Git & GitHub, CI/CD (GitHub Actions, Vercel & Railway pipelines), Vercel, Railway, Render, AWS

AWARDS & PRESS

- **1st Place**, Nomba × DevCareer Hackathon — $4,000 (Jun 2026)
- **2nd Place**, Wema Hackaholics 7.0 — Wema Bank (Aug 2026)
- **Top 5 Finalist**, Heirs Insurance Hackathon (2025)
- **Featured** in Punch, BusinessDay, Naijapreneur, Nidacity (Jul 2026)

EDUCATION & CERTIFICATIONS

- **B.Sc. Software Engineering** (expected 2027) — Miva Open University
- **Diploma, Software Engineering** — New Horizon Computer College, 2022–2024
- Certified Nomba Developer — Nomba × DevCareer (2026)
- The Udara Project × NSK.AI — AI learning cohort, Certificate of Participation (2026)
