SELECTED PROJECTS

RelayFlow — Multi-channel AI agent for businesses — Live · Aug 2026

- Built an AI agent that unifies WhatsApp, Telegram, Slack and Gmail into one chat — summarises recent conversations per channel and broadcasts replies everywhere, gated by a mandatory approve-before-send step.
- Engineered the connector layer (WhatsApp QR, Telegram 2FA, Slack & Gmail OAuth), SSE-streamed agent activity and cron-scheduled tasks that email their results.

Stack: Fastify · TypeScript · React/Vite · OpenAI Responses API · MongoDB · Railway

TrustBridge AI — Real-time bank fraud protection — 2nd Place · Wema Hackaholics 7.0

- Designed a behavioural fraud engine that scores every login and transfer against the customer's own baseline and intervenes mid-attack via a graduated ladder (allow → challenge → step-up → freeze & alert).
- Built deepfake-resistant liveness: four randomised challenges per run, MediaPipe face/gesture models running entirely in-browser, guided by a Gemini voice.

Stack: Python · NiceGUI (FastAPI + WebSockets) · MediaPipe · Google Gemini · MongoDB Atlas

PayWise — AI bookkeeping on WhatsApp for market traders — 1st Place · Nomba × DevCareer

- Merchants record credit sales as WhatsApp voice notes in Pidgin, Yoruba, Igbo or Hausa; an LLM pipeline extracts customer, items, amounts and due dates into a ledger automatically.
- Integrated the Nomba banking API to issue a virtual account per debtor for instant repayment, with a dashboard for wallet activity and outstanding debts.

Stack: FastAPI · LangGraph · GPT · Twilio WhatsApp · Nomba API · MongoDB

Study Master — AI exam-prep for WAEC, NECO & JAMB — 50+ active students

- Shipped an AI study companion with curriculum Q&A, auto-generated CBT mock exams with worked explanations, flashcards and personalised study plans mapped to the official syllabi.

Stack: Next.js · React · FastAPI · OpenAI API · MongoDB · Vercel

My School Manager — School operations platform — Trusted by 5+ schools

- Built an all-in-one platform — CBT portal with instant grading, AI exam-paper generator, smart notes, print-ready report cards and admin analytics — used daily by teachers, students and administrators.

Stack: Node.js · Express · React · MongoDB · AWS

EXPERIENCE

Software Engineer — Tinzwave Technologies — 2024 – Present

- Built and shipped **KizFarm** (farm-to-home marketplace, Next.js/TypeScript/Express) and **NairaGame** (gaming community & marketplace PWA used by thousands, Node.js/MongoDB) as production client products.
- Taught an international student Data Science one-to-one — Python, data pipelines and ML fundamentals.

Freelance Software Engineer — Independent — 2023 – Present

- Designed, built and operate RelayFlow, TrustBridge AI, PayWise, Study Master and My School Manager end to end — owning hosting, domains, payments and email infrastructure.
