EXPERIENCE

Software Engineer — Forward-Deployed AI Delivery · Tinzwave Technologies 2024 – Present

- Embedded with client businesses as the technical point of contact: run customer discovery and requirements workshops, scope AI solutions against real workflows, then build, deploy and iterate them in production.
- Delivered **KizFarm** (farm-to-home marketplace: verified-farmer onboarding, live order tracking, instant payouts; Next.js/TypeScript/Express) and **NairaGame** (gaming community & marketplace PWA serving thousands of users; Node.js/MongoDB) from first stakeholder meeting to launch.
- Own post-launch feedback loops, bug triage, iteration and stakeholder updates; taught an international student Data Science one-to-one.

Freelance Software Engineer — customer-embedded AI product delivery 2023 – Present

- Onboarded and supported **5+ schools** on My School Manager: sat with administrators and teachers to map operations, configured the platform per school, trained staff, and iterated on CBT, reporting and AI exam-generation features from their feedback.
- Built **PayWise** with market traders in the loop — validated the voice-note ledger flow with real merchants in Pidgin, Yoruba, Igbo and Hausa, integrated the Nomba banking API for debtor virtual accounts, and won 1st place at the Nomba × DevCareer Hackathon.
- Own hosting, payments, email and monitoring for every deployment (Vercel, Railway, AWS, Docker, Git-based CI/CD).
