EXPERIENCE

Software Engineer, Forward-Deployed AI · Tinzwave Technologies — 2024 – Present

- Embedded with client businesses as the technical point of contact: run discovery and requirements workshops, scope AI solutions against real workflows, then build, deploy and iterate them in production.
- Delivered **KizFarm** (farm-to-home marketplace; Next.js/TypeScript/Express) and **NairaGame** (gaming community & marketplace PWA serving thousands; Node.js/MongoDB) from first stakeholder meeting to launch, then owned post-launch iteration.

Freelance Software Engineer · customer-embedded AI product delivery — 2023 – Present

- Onboarded and supported **5+ schools** on My School Manager — mapped operations with administrators and teachers, configured per school, trained staff, iterated CBT and reporting from their feedback.
- Built **PayWise** with market traders in the loop and **RelayFlow** with SME owners; own hosting, payments, email and monitoring for every deployment.

SELECTED DEPLOYMENTS

RelayFlow — Multi-channel AI agent for SMEs — Live · Aug 2026

- Built for businesses losing customers across WhatsApp, Telegram, Slack and Gmail: one agent summarises each channel and drafts replies behind a mandatory **approve-before-send** guardrail; cron-scheduled tasks email their results.
- **Eval harness**: golden Q&A set scored by an LLM judge plus scope-drift and prompt-injection tests — findings drove new guardrails, re-verified to zero injection successes.

Stack: Fastify · TypeScript · React/Vite · OpenAI Responses API · MongoDB · Railway

TrustBridge AI — Real-time bank fraud protection — 2nd Place · Wema Hackaholics 7.0

- Behavioural risk engine scoring every login and transfer against the customer's own baseline, intervening mid-attack via a graduated ladder (allow → challenge → step-up → freeze & alert); presented live to Wema Bank judges.
- Deepfake-resistant liveness: four randomised challenges per run, MediaPipe face/gesture models running entirely in-browser, guided by a Gemini voice.

Stack: Python · NiceGUI (FastAPI + WebSockets) · MediaPipe · Google Gemini · MongoDB Atlas

PayWise — AI bookkeeping on WhatsApp for market traders — 1st Place · Nomba × DevCareer

- Validated with real merchants: credit sales as voice notes in Pidgin, Yoruba, Igbo or Hausa → LLM extracts customer, items, amounts and due dates; Nomba API issues a virtual account per debtor for repayment.

Stack: FastAPI · LangGraph · GPT · Twilio WhatsApp · Nomba API · MongoDB

Study Master — AI exam-prep for WAEC, NECO & JAMB — 50+ active students

- **RAG** over the official syllabi — chunked with overlap, embedded with text-embedding-3, retrieved from MongoDB Atlas Vector Search so answers are grounded in the source; plus CBT mock exams, flashcards and study plans.

Stack: Next.js · React · FastAPI · OpenAI API · Atlas Vector Search · Vercel

My School Manager — School operations platform — Trusted by 5+ schools

- CBT portal with instant grading, AI exam-paper generator, smart notes, print-ready report cards and admin analytics — used daily by teachers, students and administrators.

Stack: Node.js · Express · React · MongoDB · AWS
