AJALA ABDULLAH

AI Engineer & Web Developer

Lagos, Nigeria · webmastersmma@gmail.com · +234 707 740 2688 · ajalaabdullah.dev · github.com/Abdullah-webd · linkedin.com/in/ajala-abdullah-478879359

SUMMARY

AI Engineer who ships production LLM applications people depend on — AI agents, fintech tooling and edtech platforms live in Nigeria today, built end to end from data model to deployment. Winner of the Nomba x DevCareer Hackathon (1st place, $4,000) and runner-up at Wema Hackaholics 7.0; work covered by Punch, BusinessDay, Naijapreneur and Nidacity. Strongest in agentic systems (LangGraph, OpenAI and Claude SDKs), FastAPI/Node backends and React/Next.js frontends.

SELECTED PROJECTS

RelayFlow — Multi-channel AI agent for businesses — Live · Aug 2026

- Built an AI agent that unifies a business's WhatsApp, Telegram, Slack and Gmail into one chat: summarises recent conversations per channel and broadcasts replies everywhere, gated by a mandatory approve-before-send step.
- Engineered the connector layer (WhatsApp QR via Baileys, Telegram 2FA via GramJS, Slack and Gmail OAuth), SSE-streamed agent activity, and cron-scheduled tasks that run an instruction and email the result.

Fastify · TypeScript · React/Vite · OpenAI Responses API · MongoDB · Railway

TrustBridge AI — Real-time fraud protection for bank customers — **2nd Place, Wema Hackaholics 7.0** · Aug 2026

- Designed a behavioural fraud engine that scores every login and transfer against the customer's own baseline and intervenes during the attack via a graduated ladder (allow → challenge → step-up → freeze & alert).
- Built deepfake-resistant liveness verification: four randomised challenges per run with MediaPipe face and gesture models running entirely in-browser, guided by a Gemini-generated voice.

Python · NiceGUI (FastAPI + WebSockets) · MediaPipe · Google Gemini · MongoDB Atlas

PayWise — AI bookkeeping on WhatsApp for market traders — **1st Place, Nomba x DevCareer Hackathon** · Jun 2026

- Merchants record credit sales as WhatsApp voice notes in Pidgin, Yoruba, Igbo or Hausa; an LLM pipeline extracts customer, items, amounts and due dates into a ledger automatically.
- Integrated the Nomba banking API to issue a virtual account per debtor for instant repayment, with a dashboard for wallet activity, payouts and outstanding debts.

FastAPI · LangGraph · GPT · Twilio WhatsApp · Nomba API · MongoDB

Study Master — AI exam-prep companion for WAEC, NECO and JAMB — **50+ active students** · studymaster.live

- Shipped an AI study companion with curriculum Q&A, auto-generated CBT mock exams with worked explanations, flashcards and personalised study plans mapped to the official syllabi.

Next.js · React · FastAPI · OpenAI API · MongoDB · Vercel

My School Manager — School operations platform — **Trusted by 5+ schools** · Live

- Built an all-in-one platform — CBT portal with instant grading, AI exam-paper generator, smart notes, print-ready report cards and admin analytics — used daily by teachers, students and administrators.

Node.js · Express · React · MongoDB · AWS

EXPERIENCE

Software Engineer — Tinzwavve Technologies — 2024 – Present

- Built and shipped **KizFarm** (farm-to-home marketplace, Next.js/TypeScript/Express) and **NairaGame** (gaming community & marketplace PWA used by thousands, Node.js/MongoDB) as production client products.
- Taught an international student Data Science one-to-one — Python, data pipelines and ML fundamentals — alongside client engineering work.

Freelance Software Engineer — Independent — 2023 – Present

- Designed, built and operate RelayFlow, TrustBridge AI, PayWise, Study Master and My School Manager end to end — owning hosting, domains, payments and email infrastructure.

AWARDS & PRESS

- **1st Place**, Nomba x DevCareer Hackathon — $4,000 prize (Jun 2026)
- **2nd Place**, Wema Hackaholics 7.0 — Wema Bank (Aug 2026)
- **Top 5 Finalist**, Heirs Insurance Hackathon (2025)
- **Featured** in Punch, BusinessDay, Naijapreneur and Nidacity for the Nomba win (Jul 2026)

EDUCATION & CERTIFICATIONS

- **B.Sc. Software Engineering** (in progress, 300 Level) — Miva Open University
- **Diploma in Software Engineering** — New Horizon Computer College, 2022–2024
- Certified Nomba Developer — Nomba x DevCareer (2026)
- The Udara Project x NSK.AI — first cohort, AI learning community (Certificate of Participation, 2026)

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript (ES6+)
AI & Agents	LangGraph, LangChain, OpenAI SDK / Responses API, Anthropic Claude SDK, Google Gemini, tool & prompt design, MediaPipe (on-device CV)
Backend	FastAPI, Node.js, Express, Fastify, REST & webhook APIs, OAuth integrations, node-cron, Twilio, Resend
Frontend	React, Next.js, Vite, Tailwind CSS, Radix UI, Progressive Web Apps
Data & Infra	MongoDB / Atlas, Docker, Vercel, Railway, Render, AWS, Git & GitHub
